INDEX (prepared by Chesley W. Sanger and David R. Dawe) / 299

## INDEX

O.M. Meehan, *The Canadian Hydrographic Service: from the time of its inception in 1883 to the end of the Second World War (The Northern Mariner/Le Marin du Nord*, vol. XIV, nos. 1 and 2.

prepared by  
Chesley W. Sanger and Dennis R. Dawe

Given the highly particular nature of the manuscript, it was decided early on to ignore a fundamental rule of indexing. Normally passing references are not indexed, but it was felt that in this instance even single citations of persons, vessels and places involved in the establishment and growth of the Service and in the actual hydrographic surveying of Canada's coastal and inland waterways between 1883 and 1945 should be included. It was also necessary to adopt a number of specialized conventions:

1) although seldom provided by Meehan, secondary and tertiary place locations are identified in the index (Victoria, BC; Victoria Harbour, ONT; Victoria Harbour, PEI). It should be noted, however, that "regional" information of this nature was derived contextually, without reference to gazetteers and maps. Additionally, administrative and political boundaries changed dramatically after 1883, especially in western and northern Canada. *Place names should thus be considered accurate at the citation level only;*

2) unless generally accepted as an integral part of a port's name, the term 'Harbour', as commonly used throughout the text, is not included (St John's, NL / St John's Harbour, NL = St John's, NL);

3) for persons, given names (a minority) have been replaced by initials for consistency;

4) titles are generally ignored;

5) unless especially significant, items with more than 30 page citations are presented as (12-284:167) where the first reference is on page 12, and the last on 284, with a total of 167 individual references;

6) form and tense have been contracted to singular and present wherever possible;

7) entries for names beginning with 'Mac' or 'Saint' are alphabetized as if they are spelt out, even if contracted to 'M c' or 'St', but not 'Ste'.

Ed. Note: The text as published regrettably included some incorrect spellings. In the index, the correct spelling has been listed, with the incorrect spelling and the page where it was used in square brackets.
